Contents

Preface vii

Diffusional reactions in composite synthesis. 1
J.H. Perepezko, M.H. da Silva Bassani, J.S. Park (Madison, WI, USA) and A.S. Edelstein, R.K. Everett (Washington, DC, USA)

Reaction kinetics and biasing in Al/Ni multilayers. 13
A.S. Edelstein, R.K. Everett, G.R. Richardson, S.B. Qadri (Washington, DC, USA) and J.C. Foley, J.H. Perepezko (Madison, WI, USA)

Low angle X-ray diffraction as a probe of reactions at buried interfaces and as characterization technique for thin films 21
T. Novet, S. Kevan and D.C. Johnson (Eugene, OR, USA)

Synthesis of in situ composites through solid-state reactions: thermodynamic, mass-balance and kinetic considerations. 29
C.R. Kao, J. Woodford, S. Kim, M.-X. Zhang and Y.A. Chang (Madison, WI, USA)

In situ metal–ceramic microstructures by partial reduction reactions in the Ni–Al–O system and the role of ZrO_2 39
E. Üstündağ, P. Ret, R. Subramanian, R. Dieckmann and S.L. Sass (Ithaca, NY, USA)

Metal–ceramic microstructure control in partial reduction reactions in the model system Fe–Mn–O by doping 51
R. Subramanian, E. Üstündağ, S.L. Sass and R. Dieckmann (Ithaca, NY, USA)

Tailoring structure and properties of composites synthesized in situ using displacement reactions. 65
C.H. Henager, Jr., J.L. Brimhall (Richland, WA, USA) and L.N. Brush (Seattle, WA, USA)

Applications of in situ reactions to $MoSi_2$-based materials 75
A. Costa e Silva and M.J. Kaufman (Gainesville, FL, USA)

Formation of alumina–chromia–chromium composites by a partial reduction reaction 89
C.A. Handwerker, T.J. Foecke, J.S. Wallace, U.R. Kattner and R.D. Jiggets (Gaithersburg, MD, USA)

Reactive hot compaction of NiAl with in situ alumina reinforcement 101
H. Doty and R. Abbaschian (Gainesville, FL, USA)

Processing, microstructure, and properties of co-continuous alumina-aluminum composites 113
M.C. Breslin, J. Ringnalda, L. Xu, M. Fuller, J. Seeger, G.S. Daehn, H.L. Fraser (Columbus, OH, USA) and T. Otani (Tokyo, Japan)

Feasibility of aluminium nitride formation in aluminum alloys. 121
Q. Hou, R. Mutharasan (Philadelphia, PA, USA) and M. Koczak (Philadelphia, PA, USA)

Reaction-infiltrated, net-shape SiC composites 131
L. Hozer, J.-R. Lee, Y.-M. Chiang (Cambridge, MA, USA)

Processing of damage-tolerant, oxidation-resistant ceramic matrix composites by a precursor infiltration and pyrolysis method . 145
F.F. Lange, W.C. Tu and A.G. Evans (Santa Barbara, CA, USA)

Synthesis and properties of Ni–α-Al_2O_3 composites via sol–gel 151
E.D. Rodeghiero, O.K. Tse, J. Chisaki and E.P. Giannelis (Ithaca, NY, USA)

Residual stress relaxation behavior in Al_2O_3–SiC nanocomposite. 163
J. Fang, H.M. Chan and M.P. Harmer (Bethlehem, PA, USA)

Anisotropic grain growth in TiO_2-doped alumina 169
D.S. Horn and G.L. Messing (University Park, PA, USA)

CONTENTS (*continued*)

Computer simulation of anisotropic grain growth 179
W. Yang, L.Q. Chen and G.L. Messing (University Park, PA, USA)

Control of texture in monolithic alumina 189
D. Brandon, D. Chen and H. Chan (Bethlehem, PA, USA)

In situ processed Si_3N_4 whiskers in the system barium aluminosilicate–Si_3N_4 197
D.W. Freitag (Dallas, TX, USA)

Factors affecting the fracture resistance of silicon nitride ceramics 207
D.R. Clarke and R. Tandon (Santa Barbara, CA, USA)

High-temperature stability of monazite–alumina composites 215
P.E.D. Morgan, D.B. Marshall and R.M. Housley (Thousand Oaks, CA, USA)

Silicon oxycarbide coatings on graphite fibers: chemistry, processing, and oxidation resistance 223
M. Harris, R.M. Laine (Ann Arbor, MI, USA) and T. Chaudhary, L. Drzal (East Lansing, MI, USA)

Silicon oxycarbide coatings on graphite fibers 237
II. Adhesion, processing, and interfacial properties
T.M. Chaudry, H. Ho, L.T. Drzal (East Lansing, MI, USA) and M. Harris, R.M. Laine (Ann Arbor, MI, USA)

Oxide-fiber–oxide-matrix composites 251
L.C. Lev and A.S. Argon (Cambridge, MA, USA)

Fibrous monoliths: non-brittle fracture from powder-processed ceramics 263
G. Hilmas, A. Brady, U. Abdali, G. Zywicki and J. Halloran (Ann Arbor, MI, USA)
